WORK EXPERIENCE

The Entrepreneurship Network

Remote

Web Developer Intern

Feb 2025 - May 2025

- Owned the Careers page module of the company website, contributing independently while collaborating with a team of 10–15 developers across other application modules.
- Addressed frontend issues raised by senior developers, resolving UI bugs and logic errors within 24 hours to maintain development momentum.
- Submitted updates directly to GitHub after local testing, where senior engineers reviewed and validated functionality, maintaining 100% working build.
- Adjusted layout and styling using responsive design principles to ensure consistent display across mobile, tablet, and desktop screens, reducing UI inconsistencies by 90% across breakpoints

EDUCATION

Bachelor of Commerce Computer Applications

Sri Arunodaya Degree College

June 2020 – May 2023

TECHNICAL SKILLS

Frontend: HTML5, CSS3, SCSS (SaaS), Bootstrap, Tailwind CSS, Material UI, JavaScript, jQuery, React.js, Redux,

Backend: Node.js, Express.js, RESTful APIs, MERN Stack

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code, Figma

PROJECTS

Chat Application (React.js, Tailwind CSS, Node.js, MongoDB, Socket.IO) [LINK](#) Mar 2025 – Apr 2025

- Built a Full Stack Live messaging platform using socket.io with user registration, login, and secure email-based password reset, improving account recovery success by 90%.
- Created a responsive chat interface supporting live text communication, optimized socket connections, and improved state updates, reducing latency and increasing session time by 35%.
- Implemented file-sharing capability for images and PDFs with preview rendering, file type validation, and secure upload handling, improving user interactions by 40%.
- Enabled a profile update feature allowing users to modify personal details and upload profile images, improving user retention by 25%.
- Monitored user presence tracking to display last-seen status, boosting awareness of active users by 50%.

Expense-Tracker (React, Tailwind CSS, Chart.js, Nodejs, MongoDB) [LINK](#) Mar 2025 – Apr 2025

- Engineered a full stack expense tracking application with JWT authentication and session storage, enabling secure multi-device access for managing income and expenses.
- Developed transaction management functionality for adding, editing, and deleting entries with date and category filters, improving control over financial data by 40%.
- Formulated a dashboard using Chart.js to visualize spending patterns via pie and bar charts by category and month, helping users understand and track expenses effectively.
- Refined expense logging and categorization, reducing manual entry time by 50% and improving data organization.
